NET LIQUIDATION

THE DAY IN REVIEW

The desk carried balanced conviction today with fourteen stock decisions anchored by META and MSFT at 7/10 conviction—both initiated as buys. JPM, MARVELL, and NVIDIA round out our core thesis at 6/10 conviction. Options activity remains robust with eleven picks deployed across a mix of bullish call spreads (AVGO, CRWD, GOOGL, MRVL, MSFT, ORCL, PANW) and bearish put spreads (JPM, LULU, META), all marked at 7/10 confidence and focused on defined-risk structures.

The Alpaca funds closed the session in mixed territory with combined net liquidity of \$303,330. The Aggressive Fund leads at +3.8% return with \$103,828 equity across six positions, while the Balanced Fund sits at -0.4% with unrealized losses of \$377 across four holdings. The Options Book is essentially flat at -0.1%. Twelve open positions remain on the books with \$99,880 deployed in the options sleeve, maintaining dry powder for continued tactical entry points.

DAILY ANALYSIS

AVGO debit call spread bullish · 7/10 · high

Six-setup BUY signal (MACD cross, Ichimoku perfect alignment, pivot resistance break above \$439.79, supertrend intact) with all four targets pointing up — 30d target \$480 anchors the short strike. Buying the spread post-earnings-crush in the

Jul 17 expiry captures the \$460→\$480 technical continua...

CRWD debit call spread bullish · 7/10 · high

Measured-move chart target of \$1,049 (34% above spot) needs time to develop; the Sep 18 expiry gives 108 days for the trend to extend post-earnings. Buying the \$800 call and selling \$900 against it captures the first leg of the structural move at reduced cost versus a naked long, while high IV ra...

GOOGL debit call spread bullish · 7/10 · high

Stochastic cross from oversold plus perfect Ichimoku alignment give a clean short-term BUY trigger; the 380/385 spread targets the chart's nearest resistance at 387.35 with defined risk and a 3-to-1 reward-to-risk profile at mid-prices.

JPM debit put spread bearish · 7/10 · high

Post-earnings (Jul 14) downtrend continuation play — with EMA50 (\$302.75), EMA200 (\$298.72), anchored VWAP (\$303.45), and the Ichimoku cloud all stacked above spot as resistance, the path of least resistance remains lower toward the \$280 structural support zone; Aug 21 expiry cleanly clears earni...

LULU debit put spread bearish · 7/10 · high

Chart target of \$119.14 (nearest swing support) anchors the profit-take strike at \$120; 45 DTE gives the Ichimoku/supertrend bearish setup time to fully develop, and the 10-wide spread width pays nearly 3.2:1 if LULU closes at or below target by July expiry.

META debit put spread bearish · 7/10 · high

Extending the VWAP-breakdown / Ichimoku cloud-rejection setup into 10 DTE to give the bearish chart read room to work; long \$600p anchored at cloud bottom (\$605.89), short \$585p below the BB lower (\$591.46) and near the chart structural target (\$598.86 support that, if broken, opens space to \$585).

MRVL debit call spread bullish · 7/10 · high

The 90d fundamental target of \$290 and chart target of \$309.50 are directionally unanimous but magnitude-diverged, warranting a defined-risk structure; buy the \$230 call and sell the \$250 call on Sep-18 to capture the core move toward \$290 within a debit vertical that survives IV uncertainty over...

MSFT debit call spread bullish · 7/10 · high

30d fundamental target is \$470 with three of four targets pointing up; buying the ATM and selling the \$470 strike caps the spread at the agreed near-term target and produces a 1.38:1 reward-to-risk on a thesis that has directional consensus despite magnitude divergence.

ORCL debit call spread bullish · 7/10 · high

Chart-target measured-move extension to \$317.46 in a confirmed uptrend, anchored by four-setup BUY signal; 45 DTE gives the trade room to develop through and beyond the Jun 10 earnings catalyst, with the \$260/\$290 spread capturing the post-breakout continuation path while the lower IV at this ten...

PANW debit call spread bullish · 7/10 · high

Post-earnings continuation play on the strong BUY chart signal (9/10, ADX 47.6, perfect Ichimoku alignment); Jun 12 300/350 spread gives 10 DTE for the 52w high breakout to develop and captures a move toward the diverged-but-bullish target cluster, with the short leg at \$350 providing ~\$6.55 of c...

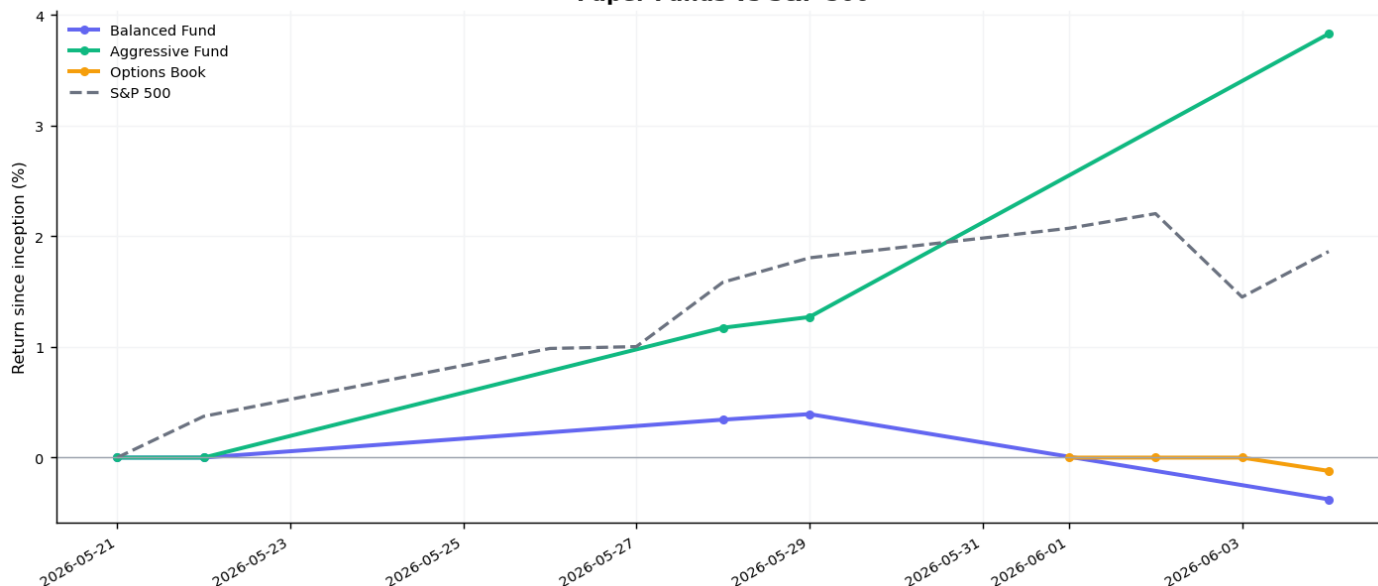

SNDK debit call spread bullish · 7/10 · high

All four targets point up with the 90d fair value at 1,950; the 30d target (1,800) is nearly at spot so the real swing move belongs to the 90d leg — 45 DTE Jul 17 expiry captures that path while the 1,800/1,900 spread stays defined-risk given the wide magnitude divergence across targets.
