NET LIQUIDATION

THE DAY IN REVIEW

The desk is positioned solidly bullish across tech and cybersecurity, with conviction buys in META, MSFT, and PANW all rated 7/10. We executed 30 stock decisions today with secondary conviction in AMD and CRWD. The options book is heavy on call spreads—ten bullish debit spreads anchored by high-conviction plays in CRWD, MRVL, and NVDA (all 8/10)—balanced against three bearish put spreads in JPM, LULU, and META. This reflects confidence in the tape strength while hedging downside in consumer and banking.

The Alpaca funds total \$303K in net liquidity. The Aggressive Fund is outperforming at +3.8% with \$3.8K unrealized gains across six positions, while the Balanced Fund is flat to slightly underwater at -0.4% with four core holdings. The Options Book sits at -0.5%, a modest drag we expect to recover as our near-term spreads mature. Twelve open positions remain active across all three accounts with solid tailwinds from the broader momentum in semiconductors and software.

DAILY ANALYSIS

AMD debit call spread bullish · 7/10 · high

Same five-setup BUY read with a week of runway; buy the \$520 strike (near-ATM ~+0.52 delta) and sell the \$535 to cap cost against rich absolute IV, targeting the chart resistance cluster at \$542 and the 52w high at \$546.44 within 8 days.

AVGO debit call spread bullish · 7/10 · high

Six-setup BUY signal (MACD cross, Ichimoku perfect alignment, pivot resistance break above \$439.79, supertrend intact) with all four targets pointing up — 30d target \$480 anchors the short strike. Buying the spread post-earnings-crush in the Jul 17 expiry captures the \$460→\$480 technical continua...

CRWD debit call spread bullish · 8/10 · high

Chart structural swing resistance sits at \$782 (confluent with 52w high \$785.66); buy the \$720 call with 43 DTE to get above the near-term stochastic noise zone and sell the \$770 call — the nearest available strike to the \$782 target — capping the spread while capturing most of the swing move.

GOOGL debit call spread bullish · 7/10 · high

Stochastic cross from oversold plus perfect Ichimoku alignment give a clean short-term BUY trigger; the 380/385 spread targets the chart's nearest resistance at 387.35 with defined risk and a 3-to-1 reward-to-risk profile at mid-prices.

JPM debit put spread bearish · 7/10 · high

Post-earnings (Jul 14) downtrend continuation play — with EMA50 (\$302.75), EMA200 (\$298.72), anchored VWAP (\$303.45), and the Ichimoku cloud all stacked above spot as resistance, the path of least resistance remains lower toward the \$280 structural support zone; Aug 21 expiry cleanly clears earni...

LULU debit put spread bearish · 7/10 · high

Downtrend confirmed by four setups with chart structural target at \$119.14 swing support; buying the \$125 put and selling just above the target at \$119 captures the full projected move while the high-IV environment makes the short leg a meaningful premium offset.

META debit put spread bearish · 7/10 · high

Extending the VWAP-breakdown / Ichimoku cloud-rejection setup into 10 DTE to give the bearish chart read room to work; long \$600p anchored at cloud bottom (\$605.89), short \$585p below the BB lower (\$591.46) and near the chart structural target (\$598.86 support that, if broken, opens space to \$585).

MRVL debit call spread bullish · 8/10 · high

Chart is a perfect-score BUY with BB upper-band walk, supertrend intact, and all six setups aligned — momentum continuation toward the 52w high at 324.20 is the near-term path; the 310/320 spread captures that move at defined risk given elevated absolute IV levels.

MSFT debit call spread bullish · 7/10 · high

Three of four targets point to a \$453–\$470 range within 30 days; buying the \$430 call (near ATM, above Kijun resistance at \$431.73) and selling the \$455 call (above the \$453.07 structural calc target) on Jul 2 expiry captures the front-loaded move with defined risk and clears before July 29 earni...

NVDA debit call spread bullish · 8/10 · high

30d target of \$230 is a shared convergence point across all four targets with full agreement; a 220/230 bull call spread with 28 DTE captures the full 30d thesis at 1.7:1 max reward/risk while the short leg at \$230 naturally caps the position at the agreed target level.

ORCL debit call spread bullish · 7/10 · high

Chart-target measured-move extension to \$317.46 in a confirmed uptrend, anchored by four-setup BUY signal; 45 DTE gives the trade room to develop through and beyond the Jun 10 earnings catalyst, with the \$260/\$290 spread capturing the post-breakout continuation path while the lower IV at this ten...

PANW debit call spread bullish · 7/10 · high

90d price target at 325 calls for longer-dated exposure; buy the Aug-21 300c and sell the 320c to capture the 300→325 path, with the short leg capping at an easily achievable level on the way to the fundamental target. Diverged target set warrants defined-risk spread; no earnings catalyst inside...

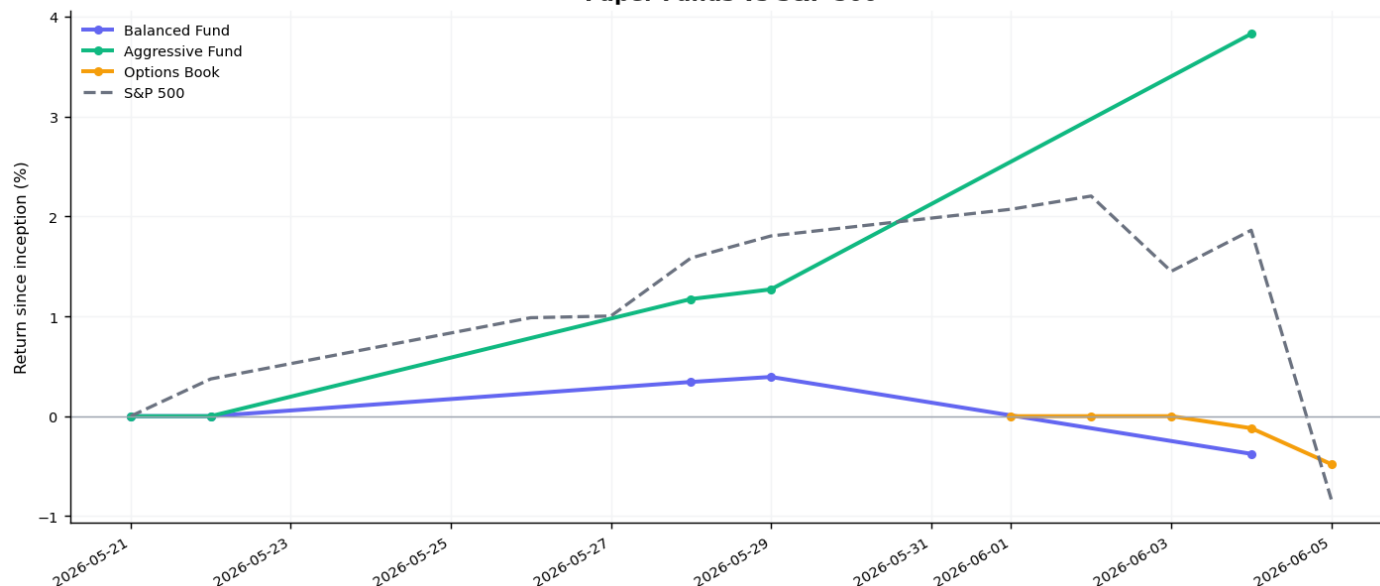

SNDK debit call spread bullish · 7/10 · high

All four targets point up with the 90d fair value at 1,950; the 30d target (1,800) is nearly at spot so the real swing move belongs to the 90d leg — 45 DTE Jul 17 expiry captures that path while the 1,800/1,900 spread stays defined-risk given the wide magnitude divergence across targets.
