THE DAY IN REVIEW

The desk executed 30 stock decisions today with moderate conviction across healthcare and telecom. ABBV and CI both earned 7/10 buy ratings on fundamental strength, while VZ drew a 7/10 sell despite its dividend appeal. MO and MRVL round out the conviction list at 6/10. The options book remained active with 13 picks, predominantly bullish debit spreads across semiconductors and cloud infrastructure—AMD, CRWD, GOOGL, MRVL, MSFT, MU, and NVDA all trading at 7/10 or 8/10 conviction. AVGO and HCA took bearish stances at 8/10 confidence via put spreads and long puts respectively.

The fund complex sits at \$299.5K net liquidity across 19 open positions. Aggressive Fund leads with +1.8% return on \$101.8K equity, while Balanced Fund trails at -1.2% with \$98.8K deployed across four names. The Options Book mirrors the broader weakness at -1.1%, with unrealized losses of \$1.1K offsetting modest gains elsewhere. Overall posture remains constructively positioned in tech and healthcare names, balanced against selective sector rotation headwinds.

DAILY ANALYSIS

AMD debit call spread bullish · 7/10 · high

Same five-setup BUY read with a week of runway; buy the \$520 strike (near-ATM ~+0.52 delta) and sell the \$535 to cap cost against rich absolute IV, targeting the chart resistance cluster at \$542 and the 52w high at \$546.44 within 8 days.

AVGO debit put spread bearish · 8/10 · high

Four-setup SELL signal (supertrend flip, VWAP loss, pivot break, bearish MACD cross) confirms a technical breakdown below \$399.83 support and \$403.78 VWAP; debit spread to fib-50/BB-lower zone captures the near-term directional move with defined risk given diverged fundamental targets.

CRWD debit call spread bullish · 7/10 · high

All four targets agree bullish with 30d fair value at \$755; buy the Jul 17 \$680 call and sell the \$755 call to express the 30d swing move with defined risk, with the short leg capped at the agreed 30d target. IV rank is low so buying premium via debit spread is cost-effective.

GOOGL debit call spread bullish · 7/10 · high

Stochastic cross from oversold plus perfect Ichimoku alignment give a clean short-term BUY trigger; the 380/385 spread targets the chart's nearest resistance at 387.35 with defined risk and a 3-to-1 reward-to-risk profile at mid-prices.

HCA long put bearish · 8/10 · high

Four-setup SELL signal (strength 10) with ADX 54.7 confirms a high-conviction downtrend; anchored VWAP at 366.92 and supertrend at 396.23 are overhead resistance capping any bounce, and the 410 strike put captures continuation below current price with 6.1% spread and OI of 417 supporting execution.

JPM debit call spread bullish · 8/10 · high

Chart strength-9 BUY with fresh Ichimoku TK cross and VWAP reclaim argues for a near-term push; supertrend resistance at \$314.97 is the key level to clear, so buying the \$312.50 call and selling the \$315 call on Jun 18 captures that breakout attempt with defined risk and 10 DTE to let the tape de...

MRVL debit call spread bullish · 8/10 · high

Chart is a perfect-score BUY with BB upper-band walk, supertrend intact, and all six setups aligned — momentum continuation toward the 52w high at 324.20 is the near-term path; the 310/320 spread captures that move at defined risk given elevated absolute IV levels.

MSFT debit call spread bullish · 7/10 · high

Three of four targets point to a \$453–\$470 range within 30 days; buying the \$430 call (near ATM, above Kijun resistance at \$431.73) and selling the \$455 call (above the \$453.07 structural calc target) on Jul 2 expiry captures the front-loaded move with defined risk and clears before July 29 earni...

MU debit call spread bullish · 7/10 · high

All four targets agree bullish (30d \$1,035 / 90d \$1,100) with tight 6.5% spread; July 17 expiry clears the June 24 earnings event and gives the 30d fundamental thesis ~3 weeks post-print to resolve toward \$1,035. IV rank is high so capping upside with a spread is the right execution shape — buy t...

NVDA debit call spread bullish · 8/10 · high

30d target of \$230 is a shared convergence point across all four targets with full agreement; a 220/230 bull call spread with 28 DTE captures the full 30d thesis at 1.7:1 max reward/risk while the short leg at \$230 naturally caps the position at the agreed target level.

ORCL debit call spread bullish · 7/10 · high

90d target (\$285) materially exceeds 30d (\$248), signaling an accelerating path; Sep 18 DTE captures that extended move while the \$250 short leg sits well below the 90d target, keeping most of the upside capture intact at a lower outlay than a naked long call.

PANW debit call spread bullish · 8/10 · high

All four targets agree on a 30d move to ~300, coinciding with the 52-week high cluster (302.95) and chart structural resistance; buying the 270/300 spread captures that full leg at a defined cost, with the short strike placed exactly at the consensus 30d target.

SNDK debit call spread bullish · 7/10 · high

All four targets point up with the 90d fair value at 1,950; the 30d target (1,800) is nearly at spot so the real swing move belongs to the 90d leg — 45 DTE Jul 17 expiry captures that path while the 1,800/1,900 spread stays defined-risk given the wide magnitude divergence across targets.
