THE DAY IN REVIEW

The desk maintained a constructive bias today across fifteen stock decisions, anchored by high-conviction buys in ABBV and CI (both 7/10), offset by a sell recommendation on VZ at the same conviction level. MO and MRVL round out the core watchlist at 6/10 conviction. Options activity remained robust with thirteen picks deployed, heavily skewed bullish across semiconductor and cloud infrastructure—AMD, NVDA, and MRVL debit call spreads all rated 8/10, joined by strength in JPM and MSFT. A tactical bearish stance on AVGO (debit put spread, 8/10) and HCA (long put, 8/10) provides some hedge positioning.

The Alpaca funds sit at \$296.5K combined net liquidity with mixed daily results. The Balanced Fund is slightly underwater at -1.2% return with \$98.8K deployed across six positions, while the Aggressive Fund treads near flat at +0.1% on \$100.1K. The Options Book carries the day's largest drawdown at -2.4%, reflecting unrealized losses of \$2.4K across eight spread positions, though the portfolio retains \$97.6K in equity. Overall positioning reflects conviction in tech cyclical tempered by selective defensive hedges.

DAILY ANALYSIS

AMD debit call spread bullish · 8/10 · high

30d PM target \$520 is the natural cap for the short leg; long leg at \$495 (near-ATM) rides the ichimoku/supertrend-supported uptrend into the 30d fundamental fair value, with defined risk ahead of the Aug 4 earnings event that falls outside this expiry.

AVGO debit put spread bearish · 8/10 · high

Four-setup SELL signal (supertrend flip, VWAP loss, pivot break, bearish MACD cross) confirms a technical breakdown below \$399.83 support and \$403.78 VWAP; debit spread to fib-50/BB-lower zone captures the near-term directional move with defined risk given diverged fundamental targets.

CRWD debit call spread bullish · 7/10 · high

All four targets agree bullish with 30d fair value at \$755; buy the Jul 17 \$680 call and sell the \$755 call to express the 30d swing move with defined risk, with the short leg capped at the agreed 30d target. IV rank is low so buying premium via debit spread is cost-effective.

GOOGL debit call spread bullish · 7/10 · high

Stochastic cross from oversold plus perfect Ichimoku alignment give a clean short-term BUY trigger; the 380/385 spread targets the chart's nearest resistance at 387.35 with defined risk and a 3-to-1 reward-to-risk profile at mid-prices.

HCA long put bearish · 8/10 · high

Downtrend continuation play anchored to chart_target direction with 74 DTE to absorb time decay; the 380 strike sits near the next structural support below the current anchored VWAP (366.92) and supertrend resistance (396.23), with Ichimoku in full bearish alignment and composite momentum RS at -...

JPM debit call spread bullish · 8/10 · high

Chart strength-9 BUY with fresh Ichimoku TK cross and VWAP reclaim argues for a near-term push; supertrend resistance at \$314.97 is the key level to clear, so buying the \$312.50 call and selling the \$315 call on Jun 18 captures that breakout attempt with defined risk and 10 DTE to let the tape de...

MRVL debit call spread bullish · 8/10 · high

Chart is a perfect-score BUY with BB upper-band walk, supertrend intact, and all six setups aligned — momentum continuation toward the 52w high at 324.20 is the near-term path; the 310/320 spread captures that move at defined risk given elevated absolute IV levels.

MSFT debit call spread bullish · 7/10 · high

Three of four targets point to a \$453–\$470 range within 30 days; buying the \$430 call (near ATM, above Kijun resistance at \$431.73) and selling the \$455 call (above the \$453.07 structural calc target) on Jul 2 expiry captures the front-loaded move with defined risk and clears before July 29 earni...

MU debit call spread bullish · 7/10 · high

All four targets agree bullish (30d \$1,035 / 90d \$1,100) with tight 6.5% spread; July 17 expiry clears the June 24 earnings event and gives the 30d fundamental thesis ~3 weeks post-print to resolve toward \$1,035. IV rank is high so capping upside with a spread is the right execution shape — buy t...

NVDA debit call spread bullish · 8/10 · high

30d target of \$230 is a shared convergence point across all four targets with full agreement; a 220/230 bull call spread with 28 DTE captures the full 30d thesis at 1.7:1 max reward/risk while the short leg at \$230 naturally caps the position at the agreed target level.

ORCL debit call spread bullish · 7/10 · high

All four targets agree directionally (n_up=4) with 30d consensus at \$248; diverged magnitude warrants defined risk over a naked call. Long \$220 call just above Ichimoku Tenkan/Kijun cluster with post-earnings runway, short \$250 at the 30d consensus target to cap the debit.

PANW debit call spread bullish · 8/10 · high

All four targets agree on a 30d move to ~300, which coincides with the 52-week high cluster (302.95) and chart structural resistance; buying the 270/300 spread captures that full leg at a defined cost, with the short strike placed exactly at the consensus 30d target.

SNDK debit call spread bullish · 7/10 · high

All four targets point up with the 90d fair value at 1,950; the 30d target (1,800) is nearly at spot so the real swing move belongs to the 90d leg — 45 DTE Jul 17 expiry captures that path while the 1,800/1,900 spread stays defined-risk given the wide magnitude divergence across targets.
