NET LIQUIDATION

THE DAY IN REVIEW

The desk closed with conviction on selective telecom and healthcare weakness, issuing sells on VZ (8/10) and TMUS (7/10) while establishing buys in ABBV, CI, and META (all 7/10). Overall posture leans moderately bullish in equities with disciplined shorts on overvalued names. We avoided 6 low-conviction options on ADBE and NVDA weeklies, prioritizing quality. The options book remains active with 14 picks centered on call spreads across semiconductors and industrials—GE, MRVL, INTC, and KLAC trading highest conviction (7–8/10)—balanced by bearish puts on ADBE and MCD.

Alpaca funds stand mixed. Conservative and Options books both at -1.7% return with modest unrealized losses; Balanced ticked positive at +0.7%; Aggressive leads at +1.8% with \$3,506 unrealized gains. Combined net liquidity sits at \$399K across 32 open positions. The portfolio is well-positioned for volatility heading into the long weekend, with tech spreads and healthcare longs carrying the conviction load.

DAILY ANALYSIS

ADBE debit put spread bearish · 7/10 · high

Four-setup bearish alignment with chart target \$193.41; buy the 205 put and sell the 195 put, capturing the bulk of the downtrend continuation over 25 DTE with the short leg just above the structural target.

AMAT debit call spread bullish · 7/10 · high

Four-setup BUY with live supertrend support at 580.96 and perfect Ichimoku alignment; the 620/630 spread targets the deterministic chart resistance at 628.53 for a defined-risk 8-day tape trade, with low IV making the debit structure cheap relative to width.

AVGO reviewed — not published (debit_put_spread)

CAT debit call spread bullish · 7/10 · medium

Four-setup bullish signal with a clean pivot break above 940.48 and perfect Ichimoku alignment targeting the 1060-1065 structural band; low IV makes the debit structure cheap relative to the 80-wide profit window.

COF reviewed — not published (covered_call)

GE debit call spread bullish · 8/10 · high

Five-setup BUY with ADX 40 and perfect Ichimoku alignment plus a pivot resistance break; debit spread expresses momentum continuation toward the 442 measured-move target while cutting cost basis ~50% versus a naked long and reducing net vega into the July 16 earnings event.

GIS reviewed — not published (cash_secured_put)

GLW debit call spread bullish · 7/10 · medium

Post-earnings 90d re-rate toward the \$270 consensus; buy the 250 call just above spot and sell the 270 at the near-term target ceiling for a defined-risk path into the move.

GOOGL reviewed — not published (debit_call_spread)

INTC debit call spread bullish · 7/10 · high

All four targets agree bullish; \$140/\$150 brackets the chart target \$140.94 and 30d fundamental \$155 on a defined-risk debit.

KLAC debit call spread bullish · 7/10 · medium

Three-of-four targets point up (290 at 30d) with Ichimoku perfect-bullish alignment, supertrend floor at 235.39, and a pivot breakout; the 250/270 spread is the right defined-risk vehicle given raw IV near parity making a naked long prohibitive.

MCD debit put spread bearish · 7/10 · watch

Four-setup bearish alignment with pivot support broken; spot sits between the strikes so the structure needs only modest continuation toward the \$264.54 chart target by Jul-10.

MRVL debit call spread bullish · 7/10 · high

All four targets aligned toward a 310 zone with a stochastic cross from oversold and perfect Ichimoku alignment; the 270/300 spread finances the long leg in a high-IV regime and captures the 30d swing with no earnings inside the window.

MU debit call spread bullish · 6/10 · watch

All four targets agree directionally with 30d convergence at 1080-1100; diverged magnitude warrants defined risk, so buy the near-ATM 1000 call and cap at 1065 just below the chart-target cluster.

NKE debit put spread bearish · 8/10 · high

Fresh triple-setup SELL (pivot break <\$41.51, TK bear cross, supertrend flip) targeting the \$40 lower-BB zone.

NVDA debit put spread bearish · 6/10 · medium

Pivots, Ichimoku, and supertrend all bearish with spot trapped below EMA50, VWAP, and cloud; the 195/185 spread expresses a chart-driven pullback to the fib 61.8 support at 191.90 as a defined-risk hedge against the desk's long holding.

NXPI analyzed — no edge (chart HOLD)

ORCL debit put spread bearish · 7/10 · high

Four-setup chart SELL with ADX 30 and a confirmed pivot break below 161.39; buy the 140P / sell the 137P to target chart structural support at 137.86 in a near-ATM, fully-in-play defined-risk expression.

SPY reviewed — not published (debit_call_spread)

TXN debit call spread bullish · 8/10 · high

Six-setup BUY with fresh supertrend flip and MACD cross above zero, plus a clean pivot break above \$324.89; tape set for continuation toward the 52w high and the 90d target. Short leg at \$340 caps premium in a mid-IV environment.
